Bulletin No. 104

Updated On-line PTO Configurator

We are pleased to announce the following benefits recently added to our PTO Configurator:

- New search fields: MANEX Code and OE Code;
- Twin Output PTO Specifications.

The new search filters enable the user to go to the relevant PTO specification page if the MANEX Code is already known – or reduce the time searching if the OE Code is known.

The TWIN Output configurator contains data of PTOs which are used by typical bulk tipper discharge applications where both propshaft and pump drives are required.

Visit www.man-bodybuilder.co.uk to use the updated functions.

The screenshot shows the MAN PTO Configurator website. At the top left is the MAN logo. In the top right corner, there are links for 'Sitemap' and 'Contact'. Below the logo is a navigation menu with the following items: Home, Instructions, Bulletins, Drawing Index, Spec Sheets, PTO Configurator (highlighted in yellow), and Register. The main heading is 'PTO Configurator'. Below this, there is a paragraph explaining that the configurator is divided into single output and twin output PTOs. A note states that all PTOs are clutch dependent and gearbox mounted. Below this, it says 'Prior to use, you must know the truck model, engine power and gearbox type.' and 'Select one of the following options to begin:'. There are two buttons: 'Single Output' and 'Twin Output'. On the right side, there are three sections: 'Register for Alerts' with a link to register, 'Adobe Reader' with a link to the Adobe website, and 'Quicklinks' with links to the MAN website, MANTED Help (PDF), and MANTED website.

Should you have any queries on the above, please contact Product Engineering on 01793 448170 or email bodybuilder@man.co.uk.

Please circulate and then retain in the Bodybuilder's Manual
