

## Bodybuilder's Bulletin

30 April 2013

Bulletin No. 125

**SLP (Safe Load Pass) – changes to cigarette lighter**

Please be aware that at the last meeting of the SLPS (Safe Loading Pass Steering) committee on 10<sup>th</sup> April, a decision was taken regarding cigarette lighters in all vehicles.

**With immediate effect**, all new vehicles being submitted for SLP are **NOT** allowed to have any form of cigarette lighter socket fitted.

If fitted, it must be totally removed.

For existing vehicles, it is acceptable to fill the cigarette lighter socket with silicone.

Any vehicle being presented for SLP from today must comply with one of the above as appropriate.

*Should you have any queries on the above, please contact Engineering on 01793 448170.*  
**Please circulate and then retain in the Body Builders Manual.**
