

## Bodybuilder's Bulletin

08 March 2007

### Bulletin No. 092

#### Technical Changes to TG Product (i.e. extra axles, wheelbase extensions etc)

Any changes to wheelbase, the addition of extra axles or the conversion of 6x2 pusher axle tractor to tag axle rigid requires the approval of MAN and the creation of a data conversion file.

This new data file will include all the changes necessary for the EBS system and ECAS air suspension system where fitted.

Under new rules set out by MAN, there is now a requirement to complete and submit a new form in addition to the ones currently used. This new form, together with existing ones are available upon request from any dealership through their Service Department Intranet portal.

Once the appropriate forms have been completed by the converter, all forms should be passed via the MAN Service Dealer to Sales Engineering for authorisation. Once authorised, the request will be submitted to Munich for processing. **Please ensure** that forms 33 and 34 (where applicable) are completed and submitted electronically.

The dealer should ensure that the Request for Confirmation Form has:

- a: their dealer stamp on the bottom of the form together with the name of the contact in block letters
- b: their email address alongside the original in Section 1.

The dealer will then receive via email, a confirmation of delivery. A copy of this confirmation will also be sent to MAN Technical Service at Swindon.

If, after checking the application MAN find that there is essential information missing, this will also be noted in the email confirmation.

Typically, data conversion files can take anything from 3 days to 6 weeks to process depending on the level of change to the chassis, so it is important to apply for the file as soon as the chassis number is available.

The introduction of EBS5 across the TG range has meant that some conversions that were possible previously, are no longer possible at this time. If you are in any doubt as to whether the conversion being considered is possible, please contact Sales Engineering on the number below.

*Should you have any queries on the above, please contact Engineering on 01793 448170.*

**Please circulate and then retain in the Body Builders Manual.**
