

## Bodybuilder's Bulletin

26 September 2007

Bulletin No. 095

### MANTED Bodybuilder website

The German MANTED website (including the Guidelines to Fitting Bodies) has been completely updated with revised data. This took effect from 14 September 2007.

The site has a new fresh look and is easier to navigate. All sections are available as downloads from the homepage if needed.

There are now individual sections for all product ranges including the new TGX and TGS.

Please note that **ALL** previous versions that you may have downloaded are no longer applicable, therefore please use the latest data on the website. This includes F2000, M2000 and L2000.

*Should you have any queries on the above, please contact Engineering on 01793 448170.*  
**Please circulate and then retain in the Body Builders Manual.**
