

## Bodybuilder's Bulletin

08 February 2008

**Bulletin No. 099**

### Remote Engine Stop and Start

MAN offer the option of preparing the vehicle for the retrofit of an engine start/stop switch. This switch is added by the bodybuilder as part of their equipment specification. The sales option code for remote engine start/stop depends upon the chassis type in question and are as follows:

Sales Code	Description
280HL	Engine stop/start at frame end
280HD	Engine stop/start under front grille

To download a copy of each wiring diagram, click on the links below:
