

Bulletin No. 141a

Changing of Base Vehicle approvals from Regulation 2007/46 to 2018/858

MAN Truck & Bus SE has taken the decision to homologate all of the below vehicles types according to the Regulation (EU) 2018/858, moving away from (EC) 2007/46. The change to Homologation will apply to all of the below vehicle types with a Start Of Production (SOP) after 15/12/2021.

This information is to all holders of a multi-level type approval based on a MAN type approval. Please note that the agreement on the multi-stage type approval procedure must be adapted based on Regulation (EU) 2018/858 accordingly.

We have produced the below table to help with changing over to the new approvals.
